## **FOR IMMEDIATE RELEASE:**

### **Sequoia Realty Services Extends its Roots in Commercial Real Estate**

*Dan Skehan Joins the Sales and Leasing Team as a Licensed Commercial Broker*

**REDWOOD CITY, CA. April 29, 2010** – Sequoia Realty Services, a full-service real estate company serving the Peninsula with an expansive portfolio of office, retail, industrial and residential properties; announced the addition of Dan Skehan as a Commercial Broker based out of their Redwood City headquarters.

“We are pleased that Dan has joined our team,” said Gina Henson, President of Sequoia Realty Services. “He is an intelligent, hard-working and an aggressive individual versed in the necessary skills required for this niche market.”

Skehan has a 10 year career in the real estate industry with a background in institution appraisal, as well as commercial real estate consulting and brokerage. Recently, he concentrated on the representations of owner-user buyers and private capital investors throughout the San Francisco Bay Area for Cornish & Carey Commercial.

By combining Skehan’s local reputation and versatility with the firm’s existing talent, Sequoia Realty Services has the opportunity to respond faster and provide a more cost effective approach than the competition. Leveraging a broad network of contacts gained throughout his career, Skehan is able to connect property owners with tenants and investors in order to maximize their real estate holdings. In his new role, his responsibilities will include property valuation, client representation on the acquisition or disposition of properties, commercial leasing and transaction management.

“An expanding company in this economic environment sends a positive message to the local real estate community and the business leaders in Redwood City,” according to Jeff Badstubner, Vice President of Sequoia Realty Services.

Skehan joins a solid team of licensed real estate professionals and property managers—who cumulatively possess over 100 years of real estate experience and have personally owned and managed income property for the last 40 years. The collective effort of these individuals brings forth a geographically focused portfolio within the Santa Clara and San Mateo counties—totaling nearly a billion dollars in value and a million square feet.
